

Benefits and Conditions

A free health examination is given on entry. Membership of the Scheme entitles you to receive free treatment for the registered cat, dog or rabbit. Out-patient fees, operations, x-rays and laboratory investigations are all covered, provided they are carried out at one of our surgeries. The **whole** of the fee is covered, whether large or small. All you pay is the discounted cost of medicines and dressings. Your pet is eligible for up to £3000 of free treatment by a specialist or £500 at an emergency clinic. The annual vaccination is free.

**Free Vaccination
included**

The animal must be healthy to join but may remain on the Scheme no matter how bad its health becomes. To benefit from free vaccination or referral treatment you must agree to remain on the Scheme for at least six months.

Additional pets may enter the Scheme at a reduced rate and there will be a ten per cent reduction in your renewal subscription if, apart from the annual booster or pet care and anti-parasite purchases, you have no need to make use of the scheme.

How do I join?

It's simple: Make an appointment for your pet's free health check. Fill in the membership and direct debit forms and pay your first subscription.

How do Insurance Policies compare?

These are some of the advantages of the Health Scheme which are not available on commercial insurance policies:

- No limit to the amount of cover.
- All illnesses are covered. We will not exclude anything that develops during membership, so life-long problems are covered—for life.
- There is no excess to pay (i.e. **all** the fee is covered) and there is no delay in claiming back fees or claim forms to complete. (except for out-of-hours and specialist treatment)
- We include many things that no insurance policy can cover, such as vaccination, nail clipping, minor ailments—and a check-up whenever you want.
- A range of discounts for non-medical procedures such as neutering, behaviour counselling, anti-season injections, micro-chipping, grooming, preventative healthcare, etc.
- Discounts for pet-care products, worm and flea preparations, and diets.
- Discounts for additional pets and for pets that remain healthy.
- Your subscription will not be increased because of age or illness.

The Orchard Pet Health Scheme

Free treatment for life

This age of rapidly increasing medical knowledge and technical development means that there is now a much greater opportunity to keep pets healthy and prolong their lives than was ever possible in the past. Access to these new treatments and services, however, has caused an escalation of medical costs. The prudent pet owner these days takes steps to insure against the possibility of unexpected medical fees.

The Orchard Veterinary Centre has for many years provided a safe and sure way of providing high quality, no worry, veterinary treatment with its Pet Health Scheme.

For a modest subscription (monthly direct debit or annual payment) your pet cat, dog or rabbit, is covered for **unlimited** veterinary treatment at any of our surgeries for the rest of its life. So you have peace of mind and your pet has the best treatment we can offer.

Free treatment, vaccination and a range of discounts make this the ideal complete health care package for your pets.
